SUMMARY

B.Tech Information Technology graduate skilled in SQL, Python, Excel, and Power BI for data analysis. Experienced in data cleaning, exploratory data analysis, KPI analysis, and dashboard development. Worked on projects analyzing customer churn, e-commerce returns, profitability, and business trends. Seeking an entry-level Data Analyst opportunity.

EDUCATION

Bachelor of Technology (B.Tech) in Information Technology
Kingston Engineering College, Anna University

May 2025
CGPA: 8.27

SKILLS

Programming & Query Languages: Python, SQL

Data Analysis: Pandas, NumPy, Data Cleaning, Exploratory Data Analysis (EDA)

BI & Reporting: Power BI, Excel, DAX, Power Query, Dashboard Development, KPI Analysis

Database: MySQL

Version Control: Git, GitHub

EXPERIENCE

Data Science Intern
Shiash Info Solutions Private Limited

Jul 2024 -- Sep 2024

- Analyzed an e-commerce dataset using Excel for data analysis and reporting.
- Cleaned and prepared an e-commerce dataset using Python for analysis.
- Created interactive Power BI dashboards to visualize e-commerce data and generate insights.

PROJECTS

Banking Customer Churn Analysis

[GitHub](#)

- Analyzed 10,000 banking customer records using Python, Pandas, SQL, MySQL, and Power BI.
- Calculated a 20.38% overall churn rate across 2,038 churned customers.
- Identified higher churn among customers in Germany, inactive customers, customers aged 51--60, and customers with 3 products.
- Built a Power BI dashboard using DAX to track churn by location, age, gender, activity status, and product count.

E-Commerce Return & Profitability Analysis

[GitHub](#)

- Analyzed 5,000 e-commerce orders using Python, Pandas, SQL, Power BI, and Power Query.
- Identified a 29% overall return rate, with Clothing having the highest return rate at 37.43%.
- Analyzed 1,450 returned orders and identified defective products as a major return reason for Clothing.
- Developed an interactive Power BI dashboard using DAX to track KPIs, return-time analysis, profitability, and return trends.
