SUMMARY

B.Tech Information Technology graduate with knowledge of SQL, Excel, Power BI, and Python. Hands-on experience in data cleaning, analysis, and dashboard development. Built projects to analyze data and present insights using practical data analytics tools.

TECHNICAL SKILLS

Languages: SQL, Python

Data Analysis: Pandas, NumPy, Data Cleaning, Exploratory Data Analysis (EDA)

Visualization & BI: Power BI, Excel, DAX, Data Visualization

Database: MySQL

EXPERIENCE

Shiash Info Solutions Private Limited

Jul. 2024 – Sep. 2024

Data Science Intern

Chennai, India

- Cleaned and prepared data using **Python (Pandas)** and handled missing values and data errors.
- Used **Excel** to organize and analyze data.
- Learned the basics of **Power BI** and created simple reports and visualizations.

Deloitte Australia (via Forage)

Aug. 2026

Data Analytics Job Simulation

Remote

- Analyzed simulated machine data using **Tableau** to identify factories and machine types with high downtime.
- Created interactive Tableau dashboards with filters to compare factory performance.
- Used **Excel** to analyze compensation data and identify patterns related to gender pay.

PROJECTS

Healthcare Cost & Patient Treatment Analysis | *Python, SQL, Excel, Power BI* [GitHub](#)

- Cleaned and checked **54,860 patient records** using Python and SQL by removing duplicate records and invalid negative billing values.
- Used SQL to analyze patient details, admission types, length of stay, and insurance billing patterns.
- Created an interactive **Power BI dashboard** with basic DAX measures, KPI cards, and slicers to analyze hospital costs and patient data.

E-Commerce Return & Profitability Analysis | *Python, SQL, Power BI* [GitHub](#)

- Analyzed **5,000 e-commerce orders** using Python and SQL to study returns, product categories, and profit or loss.
- Created an interactive **Power BI dashboard** with slicers and charts to analyze return reasons and return timing.
- Found that **Clothing** had the highest return rate at **37.43%**, with defective products being the most common recorded return reason.

EDUCATION

Kingston Engineering College

2021 – 2025

B.Tech in Information Technology | CGPA: 8.27

Vellore, India

Government Girls Higher Secondary School

2021

HSC | 89.16%

Sri Venkateswara Matriculation High School

2019

SSLC | 86%
