## SUMMARY

B.Tech Information Technology graduate with hands-on experience in data analysis using SQL, Python, Excel, and Power BI. Skilled in data cleaning, exploratory data analysis, KPI analysis, and dashboard development. Experienced in analyzing customer churn, e-commerce returns, profitability, and business trends through data-driven projects.

## EDUCATION

**Bachelor of Technology (B.Tech) in Information Technology**

May 2025

Kingston Engineering College, Anna University

CGPA: 8.27

## SKILLS

**Programming** Python, SQL

**Data Analysis** Pandas, NumPy, Data Cleaning, Exploratory Data Analysis (EDA)

**BI & Reporting** Power BI, Excel, DAX, Power Query, Dashboard Development, KPI Analysis

**Database** MySQL

## EXPERIENCE

**Data Science Intern**

Jul 2024 – Sep 2024

Shiash Info Solutions Private Limited

- Used Python, Excel, and Power BI for basic data analysis and visualization.
- Prepared and analyzed datasets to practice data cleaning and reporting.
- Created basic reports and visualizations to present data findings clearly.

## PROJECTS

**Banking Customer Churn Analysis**

[GitHub](#)

- Analyzed 10,000 banking customer records using Python, Pandas, SQL, MySQL, and Power BI.
- Calculated a 20.38% overall churn rate across 2,038 churned customers.
- Identified higher churn among customers in Germany, inactive customers, customers aged 51–60, and customers with 3 products.
- Built an interactive Power BI dashboard using DAX to analyze churn by geography, age, gender, activity status, and number of products.

**E-Commerce Return & Profitability Analysis**

[GitHub](#)

- Analyzed 5,000 e-commerce orders using Python, Pandas, SQL, Power BI, and Power Query.
- Identified a 29% overall return rate, with Clothing having the highest return rate at 37.43%.
- Analyzed 1,450 returned orders and identified defective products as a major return reason for Clothing.
- Built an interactive Power BI dashboard using DAX for KPIs, return-time analysis, profitability, and return trends.
